Global Organized Crime Index 2025

Crime at a crossroads

The third edition of the Index includes data on criminality and resilience against organized crime for all 193 UN member states.

It demonstrates how organized crime and resilience have evolved over the last four years since the first Index was released.

To improve accessibility, the Global Initiative will release the 2025 Global Organized Crime Index in digital and PDF formats, like the 2023 report. The interactive, web-based format makes data easier to access and enhances the user experience.

This enhancement also empowers journalists, policymakers, scholars, and all our users to interact with, draw from, and share this information more effectively.
